## Working Capital Analysis

### Balance Sheet Discipline - Low Leverage & Efficient Working Capital Management

- The Gems & Jewellery sector in India, especially Jewellery Exports Business, has been impacted by gross capital mismanagement & highly levered balance sheet
- RJL, on the other hand, has been able to steadily grow its business following a highly disciplined approach based on prudent capital allocation and efficient working capital management
- Lower inventory & receivables days has been possible by close monitoring of the entire cycle from placing orders to delivery till the receipt of money
- RJL has been able to grow its revenues by 52% and EBITDA by 64% over last 5 years, whilst reducing its net debt and leverage position
- **The recent acquisition of Jay Gems Inc was also managed through internal accruals**

# Limited Exposure to Currency & Commodity Fluctuations

## Business Offers Significant Natural Hedge Leading to Limited Exposure to Currency & Commodity Risk

**The Company's functional Currency is USD since majority of the business transactions are undertaken in USD currency**

- Operating margins have been largely stable despite currency & commodity price volatilities
- Majority of the sales are in USD currency while few sales in European market are in their local currency
- Globally, sales are on MRP basis, leading to limited exposure to commodity prices & inventory price risk
- All the raw material purchases including gems, diamonds and gold, even in India, are in USD currency
- The incremental sales take into account the currency and commodity price at the time of order confirmation from customer
- A small portion of manufacturing expenses in India are booked in INR, for which commensurate hedging is undertaken
- Majority of the loans are under PSFC & PCFC are also in USD

## Healthy EBITDA Growth & Stable EBITDA Margin over Last 5 Years

## Despite Volatile Currency & Commodity Price Movements
