Management Message

Commenting on the performance for Q3 & 9M FY23, Mr. Sumit Shah – Chairman and Global CEO, Renaissance Global Limited said,

"Despite strong global headwinds, we were able to minimize the downward pressure on our revenues for 9M FY23. It was largely driven by the growth in our branded jewelry division which was up by 20% YoY.

Our high-margin Direct-to-Consumer segment remains a priority for us, and we are pleased to see it grow in the current demand scenario. The annual run-rate for the segment improved to Rs. 225 crore in 9M, further improving the 2-year revenue CAGR to 86%. We are thrilled to report that the recently acquired LGD engagement rings business has achieved breakeven towards the end of the quarter and is now poised to start contributing to our profitability going forward. We are confident that it will play a critical role in driving our D2C growth in the years to come. We remain committed to executing our integration plan efficiently and effectively, and we will continue to keep you updated on our progress.

Additionally, we were pleased to see continued demand for our branded product by our retail partners and continued strength in our plain gold business in the Middle East. However, inflationary pressure has impacted our EBITDA margins, and we expect margins to remain in the current range for the short term. We remain committed to aggressively growing our direct-to-consumer business and expect to see improvement in margins over the long term."

Growing Direct to Consumer (D2C) Business

- * During Q3 FY23, direct-to-consumer business posted revenues of Rs. 88.2 crores compared to Rs. 48.9 crores in Q3 FY22, registering a growth of 80%
- * For 9MFY23, direct-to-consumer business revenue was up by 83% to Rs.172.8 crores as compared to Rs. 94.3 Crores in 9MFY22
- * Annual revenue run rate for FY23 has improved to Rs. 225 crores from Rs. 210 crores reported in Q2 & H1 FY23, further improving the 2-year D2C revenue CAGR to 86%
- * For 9MFY23, EBITDA margins of the D2C business were impacted while we built scale and covered integration costs from our recently acquired Four Mine Inc. business. The business has now achieved breakeven and is poised to positively contribute to our profitability moving forward. We anticipate a return to our historic D2C margins in the next few quarters.

Strong Balance Sheet

Highly disciplined balance sheet approach

- Net Debt to Equity ratio as of December 2022 improves to 0.30 vs 0.41 in September 2022
- Strict control over working capital reflected in NWC days falling from 213* to 188 days

Total NWC (₹ Cr)

^{*} Net Working Cycle days is not comparable to previous periods due to recent change in revenue recognition policy in the Plain Gold Division due to which, Renaissance is now recognizing only making charges as revenue for this gold division. This will meaningfully reduce the reported revenues of the company leading to a higher NWC days number. On a like to like basis revenue recognition the NWC cycle has improved from 213 days as on Dec 21 to 188 days in Dec 22.

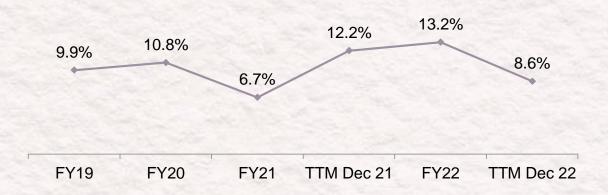

Healthy Return Ratios
