## VIII. Approach Considered in our Value Analysis:

#### General Principle for Valuation

There is no single definition of the term 'Value' that is suitable for all purposes or at all times. The value of a particular asset may vary according to different valuation methodologies that are adopted to ascertain the value for a specific purpose. Valuation of securities is an inexact science. It may sometimes involve a set of judgments and assumptions that may be subject to certain uncertainties.

## Broadly there are three approaches of Valuations which are as follows:

- a) "Net Asset Approach"
- b) "Profit Earning Capacity Value"- PECV approach
- c) "Market" Approach

#### IN SUMMARY:

The application of any method of valuation depends on the purpose for which the valuation exercise is performed; relevance of each method under the circumstances of the case and other factors as determined appropriate. The brief methodology in each of the three approaches as mentioned above is as mentioned hereunder:

- Net Asset Approach: This method takes into account the value of the assets of the business or the net worth as represented in the financial statements of the Company. For the purposes of arriving at net asset value per share, the net worth so arrived at shall be divided by the number of equity shares issued and paid-up.
- Profit Earning Capacity Value (PECV) Approach: This method of valuation presumes the
  continuity of the business and uses the past earnings to arrive at an estimate of future
  maintainable profits (FMP). For the purpose of the calculating PECV of shares, commonly
  accepted approach is to capitalize weighted average of past earnings, at an appropriate rate of
  capitalization, to arrive at the fair value per share.
- Market Approach: The market approach is a method of determining the value of shares based on the quoted price in the respective stock exchange where the shares have been listed.

## Selection of Valuation Methodology

The objective of the valuation process is to make a best reasonable judgment of the value of the Equity Shares of the Company. The Company's Equity shares are presently listed on BSE and NSE and are frequently traded at BSE and NSE. However, the Company has highest trading volume at NSE.

For the evaluation of fair valuation, we, being an independent Valuer, have considered best reasonable judgment to value the equity shares through weighted average of Market Approach (Price calculated in terms of sub-regulation (I) of 164 of SEBI ICDR 2018) and Net Asset Value and Price Earning Capacity Value (PECV).

Further, the Equity Shares of the Company is frequently traded at the BSE and NSE and highest trading volume at NSE and Price in terms of sub-regulation (1of regulation 164 of SEBI ICDR 2018 has been determined considering 17th October, 2024 as relevant date in terms of SEBI ICDR 2018 as follows:

Minimum of the Higher of the price determined through following methods was considered:

- Price determined under sub-regulation (1 of regulation 164 of SEBI ICDR Regulations as per following provisions i.e. price shall be not less than higher of the following:
  - The 90 (ninety) days volume weighted average price of the related equity shares quoted on the recognized stock exchange preceding the relevant date; or
  - The 10 (ten) days volume weighted average price of the related equity shares quoted on the recognized stock exchange preceding the relevant date

Provided that if the Articles of Association of the issuer provide for a method of determination which results in a floor price higher than that determined under these regulations, then the same shall be considered as the floor price for equity shares to be allotted pursuant to the preferential issue.

The minimum price per Equity Share in accordance with Regulation 164 of the SEBI (ICDR) Regulations is calculated at Rs. 149.66 per equity share as per **Annexure I** and we, being an Independent Valuer, have calculated Rs. 112.84 per equity shares as the fair value price of each Equity Share by using other methods as per **Annexure II**.

Method of determination of price as per the Articles of Association of the Company – Not applicable as the Articles of Association of the Company are silent on the determination of a floor price/minimum price of the shares issued on preferential basis.

Following is the summary of the Valuation:

| Whichever is higher as above   | Rs. 149.66 |
|--|------------|
| Price Calculated as per Articles of Association of the Company               | N.A.       |
| Fair Value per Share- as per Annexure-11.                                    | Rs. 112.84 |
| Value per Share as per Regulation 164 of SEBI ICDR 2018 - as per Annexure-1. | Rs. 149.66 |

#### **Valuation & Conclusion:**

In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgment taking into account all the relevant factors.

In addition to the computation of price considered under Market Price approach in our previous report, we also considered Profit Earning Capacity Value (PECV) method under Income Approach and NAV Method under Asset Approach to arrive Fair value of shares by giving equal weights to each method.

#### Rationale for Weightage:

Market Method would be the most relevant and exclusive method of valuation in case of listed entities. However, we felt a need to look beyond the market price for determining the fair market value of the company. There are three methods of valuation: Asset based, Income Based and Market Based. Even in case of the erstwhile CCI guidelines all the three methods of valuation were used. Even as per the Supreme Court judgement in case of "Hindustan Lever Employee Union V/s Hindustan Lever Ltd. [(1995) 83 CC 30]" broadly the same three methods of valuation were enunciated.

Since all the three methods of valuation have been considered and there was no reason to deviate from equal weightage for any of the methods, the weightages have been given in equal measure for each of the methods. Even if we consider independently of each method the Market Price Method is higher than all other methods used in the valuation report.

Further, the valuation as per Regulation 166A of SEBI ICDR Regulation, 2018 is not applicable. However, for good corporate governance and compliance purpose on the part of the Company, we have also considered valuation parameters as stated under Regulation 166A of SEBI (ICDR) Regulations, 2018. Further, we would like to bring it to your kind attention that as per Regulation 166A, price calculated is Rs. 112.84/- and price calculated as per Regulation 164 is Rs. 149.66/- (being the highest price) which is being considered for offer price to the shareholders.

The Fair Market Value per equity share of RGL as per above methodology is INR 149.66/- (Indian Rupees One Hundred Forty Nine and Sixty Six paisa).
