Subject: Confirmation of Satisfactory Solar System Operation – (Phase-02).

Respected sir,

Dear Mr. Rajesh Shrirame/Mr. Rajesh Iyer,

We are writing to confirm that the solar system phase 2 installed at our premises Vatsalya Ashram School, At.Chabake Talawali, Post.Bhopoli, Tq.Vikramgad, Dist. Palghar, consists of 10KW solar panels, 18 KWH of battery and necessary electrical accessories are working satisfactorily.

The Phase 2 solar plant helped us to shift our Fan load from MSEDCL to solar reducing dependency on grid power for basic requirements.

The system, which was commissioned on 27.11.2024 has been performing efficiently, and I along with the school team engaged in this activity is pleased with its overall performance.

Furthermore that the Phase 1 , 10 KW solar plant assisted us to shift our light load from MSEDCL to solar usage was commissioned in November 2023 and is already making a significant impact by extending the working hours for kitchen and housekeeping staff and study time for students especially in the evening times as our Ashram school which involves boarding and lodging of plenty of male and female students .

We are confident that the Phase 2 solar system will extend the impact and happy to reduce our reliance on fossil fuel by shifting our 70% of energy consumption on solar including Phase 1 and 2.

Thank you for your dedication (in association with the management at EOTO who introduced us with your company) and the solar vendor Mr. Veershetty K. (of Photoelectric) who executed the project and delivered high-quality renewable energy solutions and sustaining the same thereby assisting underprivileged students in the rural areas for their basic needs.

Assuring the best of our co-operation at all times in maintaining the Solar system at our premises.
